THIS WRIT PETITION (CIVIL) HAVING COME UP FOR  
ADMISSION ON 4.02.2025, THE COURT ON 24.02.2025  
DELIVERED THE FOLLOWING:

**“C.R”**

**C.S.DIAS,J**

-----  
**W.P.(C) No.31161 of 2024**  
-----

**Dated this the 24<sup>th</sup> day of February, 2025**

**JUDGMENT**

The 1<sup>st</sup> petitioner is the wife of the 2<sup>nd</sup> petitioner. The petitioners are aged 46 and 57 years, respectively. They are issueless. The 1<sup>st</sup> petitioner has undergone in-vitro fertilisation (IVF) procedures at the 4th respondent hospital. Although the doctors have advised the 1<sup>st</sup> petitioner to undergo another IVF procedure, the hospital has declined the procedure for the reason that the 2<sup>nd</sup> petitioner has surpassed the age of 55 years as stipulated under Section 21 (g) (ii) of the Assisted Reproductive Technology (Regulation) Act, 2021 ('Act', for brevity) and the petitioners fall within the purview of the term “commissioning couple” defined under the Act. Since the 1<sup>st</sup> petitioner is 46 years of age and she is

a “woman” as defined under Section 2 (1)(u) of the Act, and further, the 2<sup>nd</sup> petitioner has given his consent for the procedure; the 1<sup>st</sup> petitioner is entitled to undergo the procedure. The refusal of the hospital to provide treatment to the petitioners is an infringement of their right to life. The age restrictions laid down under the Act apply only if the man and woman participate in the Assisted Reproductive Technology (‘ART’) procedure. In the present case, only the 1<sup>st</sup> petitioner needs to undergo the procedure. Hence, the respondents may be directed to permit the 1<sup>st</sup> petitioner to avail of the ART procedure using donor male gamete.

2. The 1<sup>st</sup> respondent has filed a counter affidavit contending that, as the 2<sup>nd</sup> petitioner has exceeded the age criteria prescribed under Section 21 (g) (ii) of the Act, the petitioners are ineligible to avail the ART services. Merely because the 1<sup>st</sup> petitioner has not surpassed the age prescribed under Section 21(g)(i) of the Act, she is not entitled to proceed with the procedure. In view of Section 2(1) (e) of the Act, which explicitly defines a commissioning

couple, the petitioners have to fulfil the conditions under Sections 2(1)(e) and 21(g) of the Act. The Act has been enacted considering the status of a single woman (unmarried, divorcee and widow) and a married woman. The criteria for selecting the beneficiaries under the Act was discussed by the Parliamentary Committee as per Ext.R1(a) report. The age restrictions in the Act have been laid down after considering the best interest of the child to be born through the ART procedure. The petitioners have filed the writ petition as a couple; therefore, they fall within the definition of a commissioning couple. Section 21(g) requires a man and a woman to complete the procedure. Any married woman or married man constituting a commissioning couple and wanting to undergo an ART procedure has to simultaneously qualify the twin conditions under Sections 21(g)(i) and 21 (g) (ii) of the Act. There is no indication in the Act that only one among the men or women constitutes a commissioning couple. The age restrictions have been imposed on both parties, keeping in view the social

responsibilities of the father. As per Section 2(1)(e) of the Act, when a woman approaches an ART clinic with her man as a “commissioning couple”, they should be married and infertile as provided under Section 2(1)(j). Moreover, as per Rule 13(1)(f)(iii) of the Assisted Reproductive Technology (Regulation) Rules, 2022, a married woman is required to submit the consent of her husband in Form 8. If a married woman is permitted to approach the clinic as a woman, her husband will not come into the picture, and she will escape the stipulation under Rule 13(1)(f)(iii), which would defeat the condition under the Act and the Rules. The Act does not envisage a married woman approaching a clinic as a woman. In the process of fulfilling the desire of a couple to become parents, the rights and welfare of the unborn child should not be neglected, which is of paramount importance. To ensure the above matters are addressed, the 1<sup>st</sup> respondent has issued Ext.R1(b) instructions. The constitutional validity of Section 21(g) is under challenge before the Honourable Supreme Court of India in W.P(c) No.756/2022 and

connected cases. It is settled law that there is a presumption in favour of the constitutionality of an enactment. The petitioners have failed to plead or show that their fundamental rights have been infringed. The imposition of an upper age limit in the Act is only a reasonable restriction and cannot be said to violate the rights of individuals/couples. The writ petition is meritless and may be dismissed.

3. When the writ petition came up for admission, this Court declined to grant an interim relief because, in W.A.No.768 of 2024 and connected cases, a Division Bench of this Court has stayed the operation of interim orders passed in identical matters.

4. Aggrieved by the refusal to grant an interim relief, the petitioners filed W.A.No.1381 of 2024. By common judgment dated 21.10.2024, the Division Bench has clarified that as the fact situation in the above appeal was not under consideration in W.A.No.768 of 2024 and connected cases, it was open to the appellants to request for an early

consideration of the present writ petition. Accordingly, the writ petition and connected cases are taken up for disposal.

5. Heard; Sri. Akash Sathyanandan S., the learned counsel for the petitioners, Smt.M.Sajna, the learned counsel for the 1<sup>st</sup> respondent and Smt.Vidya Kuriakose, the learned Government Pleader.

6. The question that emerges for consideration is whether the 1<sup>st</sup> petitioner can avail of the ART services in the status as a “woman” despite being married to the 2<sup>nd</sup> petitioner who has surpassed 55 years of age.

7. The Assisted Reproductive Technology (Regulation) Bill 2020 was introduced in the Lok Sabha on 14.09.2020 and referred to the Standing Committee. The Lok Sabha passed the bill on 01.12.2021, and the Rajya Sabha passed it on 08.12.2021. The President gave assent to the Bill on 18.12.2021, and the Assisted Reproductive Technology (Regulation) Act 2021 (42 of 2021) came into force on 25.01.2022.

8. To decide the question posed, it is essential to analyse the relevant provisions in the Act, which are reproduced below for reference and understanding of the legislative intention.

(A) Section 2(1)(a) defines “Assisted Reproductive Technology” as under:

“assisted reproductive technology” with its grammatical variations and cognate expressions, means all techniques that attempt to obtain a pregnancy by handling the sperm or the oocyte outside the human body and transferring the gamete or the embryo into the reproductive system of a woman”.

(B) Section 2(1)(e) defines a “commissioning couple”, thus:

“commissioning couple” means an infertile married couple who approach an assisted reproductive technology clinic or assisted reproductive technology bank for obtaining the services authorised of the said clinic or bank”.

(C) Section 2(1)(j) defines “infertility” as follows:

“infertility” means the inability to conceive after one year of unprotected coitus or other proven medical condition preventing a couple from conception”.

(D) Section 2(1)(n) defines “patients” as under:

“patients” means an individual or couple who comes to any registered assisted reproductive technology clinic for management of infertility”.

(E) Section 2(1)(u) defines woman as follows:

“woman means any woman above the age of twenty-one years who approaches an assisted reproductive technology clinic or assisted reproductive technology bank for obtaining the authorised services of the clinic or bank”.

9. Taber's Cyclopedic Medical Dictionary defines Assisted Reproduction Technology as any of the techniques to assist infertile women to conceive and give birth. These include hormonal stimulation of ovulation and operative techniques such as in vitro fertilisation with embryonic transfer, zygote intra-fallopian transfer for women whose infertility results from tubal factors, and gamete intrafallopian transfer for couples whose infertility stems from semen.

10. In MODIs textbook of Medical Jurisprudence and Toxicology, 27<sup>th</sup> Edition, it stated that Assisted Reproductive Techniques have not only enhanced the possibility of pregnancy but have also made women conceive in situations where this would not have been possible decades ago. In in-vitro fertilisation, the eggs are surgically removed from the woman, fertilised with the available sperms in a dish, and the embryo is replaced into the womb of the woman who completes the carriage till delivery. In IVF, the semen samples of the husband are screened two or three times. In this process, the oocyte is picked up trans-vaginally.

11. What is in vitro fertilisation has been succinctly explained by the Mayo Clinic in the following manner:

“In vitro fertilization, also called IVF, is a complex series of procedures that can lead to a pregnancy. It's a treatment for infertility, a condition in which you can't get pregnant after at least a year of trying for most couples. IVF also can be used to prevent passing on genetic problems to a child. During in vitro fertilization, mature eggs are collected from ovaries and fertilized by sperm in a lab. Then a procedure is done to place one or more of the fertilized eggs, called embryos, in a uterus, which is where babies develop. IVF can be done using a couple's own eggs and sperm. Or it may involve eggs, sperm or embryos from a known or unknown donor. In some cases, a gestational carrier — someone who has an embryo implanted in the uterus — might be used. IVF may be an option if a partner has fallopian tube damage or blockage, ovulation disorders, endometriosis, uterine fibroids, previous surgery to prevent pregnancy, issues with sperm, unexplained infertility or genetic disorder”.

12. The contention of the petitioners' is that, given that only the 1<sup>st</sup> petitioner (the wife) has been advised to undergo the IVF procedure using donor male gamete, and she is under the age of 50, the age restriction imposed under Section 21 (g) of the Act does not apply to her, although the 2<sup>nd</sup> petitioner has exceeded 55 years of age.

13. Conversely, the respondents contend that both petitioners must satisfy the age criteria set forth in Section 21 (g), as they are recognised as a “commissioning couple.”

14. The terms “commissioning couple” and “woman” are defined under Sections 2(1)(e) and 2 (1) (u). However, the term “man” is notably not defined in the Act, even though age restrictions are distinctly laid down for both “woman” and “man” in Section 21 (g). Likewise, there is no specific age restriction for a ‘commissioning couple’. This omission poses a significant question of whether the legislature has excluded a composite age criterion for “commissioning couples”. The literature on the subject suggests that ART procedures are generally applied to women and men individually, even when both parties may undergo the procedure.

15. To gain further insight into the legislative intent behind Section 21 (g), it would be meaningful to refer to Ext.R1 (a) Report No.129 of the Parliamentary Standing Committee on Health and Family Welfare Suggestions on Clause 21 (g) of the Bill, which ultimately shaped into Section 21 (g). The relevant portion of the report reads thus:

“SUGGESTIONS:

4.14.14 One stakeholder has informed that the complications of IVF (Ovarian hyperstimulation syndrome, OHSS) are higher in younger woman.

The earlier guideline had kept the cut off at 21 years. It has been suggested to keep the lower age limit for woman more than 20 years to ensure safety their safety. The upper age limit for women/man should be decided based on factor viz (i) risk to maternal health due to pregnancy at advanced maternal age (ii) care of child until 18 years and average life expectancy in India.

**4.14.15 The upper limit for woman should not be beyond 45 years and for man, it should be not be beyond 50 years. The combined age of the couple (woman and man) should not be beyond 90 years (this requirement is same as for adoption in India)**

DEPARTMENT'S RESPONSE:

4.14.16 The criterion of age limit for a man and woman to avail ART services has been drafted in consonance with the provisions of the Surrogacy Bill 2019.

OBSERVATIONS/RECOMMENDATIONS:

4.14.17 The Committee observes that the DHR has agreed to the stakeholders' suggestions to remove the phrase "legal age or marriage" from the definition of woman for approaching an ART centre as lower age of marriage is acceptable in some religions. The Committee observes that the ICMR Guidelines stipulates minimum of 20 years of age for woman availing ART services. The Committee has already recommended removal of the term "legal age of marriage" and prescribed that the specific age i.e. 21 years in definition of "woman" as mentioned in the Bill under clause 2(x), therefore, the Committee reiterates the minimum of 21 years for woman and man for availing ART services. The upper age limit for woman and man may be 50 and 55 years, respectively, as recommended by the Select Committee on Surrogacy (Regulation) Bill 2020.

4.14.18 Subject to the above recommendation, the clause is adopted".

(emphasis supplied)

16. A careful reading of the above suggestions reveals that the Parliamentary Standing Committee had suggested the upper age limit for women and men not to exceed 45 and 50 and the couple's combined age (woman and man) not to

surpass 90 years to draw a parallel with the age restrictions in the Adoption Regulation. Nevertheless, the Parliament has consciously omitted incorporating any age criteria for a “commissioning couple”, possibly recognising the distinct nature of ART services and the procedures for adopting a child.

17. In this context, it is relevant to refer to Clauses 5 (4) and 5(5) of the Adoption Regulations 2022, which lays down the age criteria to adopt a child and it reads as follows:

**“5. Eligibility criteria for prospective adoptive parents.—**

\*\*\*

\*\*\*

\*\*\*

\*\*\*

(4) The age of prospective adoptive parents, as on the date of registration, shall be counted for deciding the eligibility of prospective adoptive parents for children of different age groups as under:-

Age of the Child	Maximum composite age of prospective adoptive parents (couple)	Maximum age of single prospective adoptive parent
Upto 2 years	85 years	40 years
Above 2 and upto 4 years	90 years	45 years
Above 4 and upto 8 years	100 years	50 years

Above 8 and upto 18 years	110 years	55 years
---------------------------	-----------	----------

Provided that the minimum age difference between the child and either of the prospective adoptive parents shall not be less than twenty five years.

(5) In case of a couple, the composite age of the prospective adoptive parents shall be counted.

18. Conspicuously, the Act does not contain the concept of combined age for commissioning couples analogous to the composite age criteria applicable to prospective adoptive parents. Instead, the Act adopts an individual-centric approach, whereby the age eligibility criteria are separately laid down for women and men rather than collectively for a couple. This interpretation is further supported by Section 2 (1) (n) of the Act, which defines “patients” as both individuals and couples seeking infertility treatment at a clinic. Additionally, Section 21 casts duties on the ART clinics and banks to ensure adherence to the statutory requirements. Notably, under Section 21 (g) the mandate is for the **clinics to apply ART services to a** woman only if

she is above 21 and below 50 years of age and to a man if he is above 21 and below 55 years of age. The provision reinforces that the age restriction is gender-specific rather than couple-specific, reinforcing that eligibility depends on the individual's age rather than the couple's combined age.

19. In the context of the case at hand, the 2<sup>nd</sup> petitioner has attained 57 years of age, rendering him ineligible to avail of the ART procedure. However, the couple still intends to pursue parenthood through the 1<sup>st</sup> petitioner, who desires to avail of the ART procedure of intrauterine insemination using donor male gamete, as she falls within the legally permissible age range.

20. A holistic understanding of the Act and the associated ART procedures and services reveal that the only legal requirement that the 2<sup>nd</sup> petitioner has to comply with to enable the 1<sup>st</sup> petitioner to apply the ART procedure is to give his consent in Form 8, undertaking that he would acknowledge the child born through the procedure as his legal heir.

21. In essence, the 1<sup>st</sup> petitioner's eligibility to apply for the ART procedure operates independently despite the 2<sup>nd</sup> petitioner's ineligibility, provided the 2<sup>nd</sup> petitioner gives his consent for the procedure. Hence, when a woman wants to undergo an IVF procedure, only her age is considered relevant, irrespective of her husband's age, and the same principle applies conversely to men. The above interpretation leads to an inevitable conclusion that the legislature has treated men and women as distinct legal entities under the Act rather than imposing uniform couple-centric legislation.

22. On the contrary, if the respondents' contention is accepted that both spouses must satisfy the age criteria, it would create an unconstitutional classification, treating married women and single women as separate and distinct classes. Take, for example, a hypothetical situation where a married woman is ineligible for an ART procedure solely because her husband has surpassed the age limit; the woman would become eligible immediately on her legal separation or becoming a widow. Such a classification would

be a fallacy and would put married women at an unfair disadvantage when compared to single women to access ART procedures. It can never be presumed that the Parliament intended such an inequitable classification within a benevolent statute like the Act. It is a well-established legal principle that no one can supplement conditions not explicitly provided in the statute. Without any express provision in the Act restricting commissioning couples on the basis of their composite age, there is no legal bar in a woman who is otherwise eligible under Section 21 (g) (i) from applying the ART procedure even if her husband has surpassed the age limit. The same rationale applies to men, ensuring that single and married individuals enjoy equitable access to reproductive assistance. The above discussions conclude that there is no legal bar for the 4th respondent to apply the ART procedure on the 1<sup>st</sup> petitioner. The experience of childlessness is a silent anguish known to only those who walk that path.

In light of the above discussions, I answer the question in favour of the 1<sup>st</sup> petitioner by allowing the writ petition and directing the 4th respondent to provide ART services to the 1<sup>st</sup> petitioner as per the provisions of the Act after obtaining the consent of the 2<sup>nd</sup> petitioner.
